

The Supportive Cardiology Project invites you to...

## **SAVE THE DATE**

# **Symptom Management for Patients with Late Stage HF, COPD, Renal Failure or Liver Failure**

**Thursday, June 27, 2019**

**5:30 pm –9:00 pm**

***The Delta Hotel, Victoria***

With a focus on palliative care for your non-cancer patients, attendees will participate in rotating small table case study discussions with specialists from cardiology, nephrology, respirology, hepatology and palliative care to:

- Enhance medical management for seriously ill patients with non-cancer illness
- Learn how to strategize discussing serious illness with patients who don't want to talk about it within the confines of family practice
- Learn how to reduce the use of non-beneficial medical care near death and support the patient and family as they transition.

This event is Part 2 of a two part learning series focusing on the Management of Heart Failure at end of Life and is funded by Shared Care and Island Health's Physician Forums.

### **Who should attend?**

Practising family physicians in the Greater Victoria area caring for patients with end organ failure.

**Attendance will be compensated at the Doctors of BC approved sessional rate.**

**MAINPRO+ credits will be available for this session and will be awarded based on hours attended.**

A formal invitation will be sent shortly. If you require further information at this time, please email [forums@viha.ca](mailto:forums@viha.ca)
