

LONG-TERM CARE: PROJECT PROTOTYPE

Highlights

The SOS Division in collaboration with Interior Health and 7 long-term care facilities in Penticton and Summerland, was one of five regions in the province to deliver prototypes for improving long-term care over the course of 3 years.

This project:

- Substantially increased the level of involvement that family physicians have in long-term care
- Strengthened proactive care
- Reduced emergency room visits
- Developed standardized interdisciplinary care conferences
- Was central to informing provincial strategy for improving long-term care

Project Complete: 2012 — 2015
