

LONG-TERM CARE INITIATIVES

Highlights

Our Division currently leads 4 community long-term care initiatives in collaboration with Interior Health and 13 region-wide long-term care facilities.

The initiatives are centred around 5 provincially-determined long-term care best practices: proactive visits, 24/7 coverage, attendance at care conferences; completed documentation and meaningful medication reviews.

Our Long-Term Care Initiatives have evolved into Member Services to help physicians manage long-term care challenges and promote a model of care that distributes this complex patient population.

- Supports quality proactive care
- Reduces ER visits and hospital admissions
- Increases overall patient and provider satisfaction
- Potentially reduces healthcare costs per patient

In 2018, we adopted a name change from residential to long-term care, marking a vital step in cultural sensitivity for First Nations elders.

Project: Jan 2015 — Ongoing
