

Rapid Access to CareConnect from Your EMR

[CareConnect \(Provincial eHealth Viewer\)](#), offered and supported by the Provincial Health Services Authority (PHSA), is a secure, province-wide electronic health record (EHR) that enables health care providers to access key patient information all in one place.

A 'Rapid Access' button is now available through most Electronic Medical Record (EMR) Vendors. Rapid Access from your EMR allows you to open a patient's profile on CareConnect directly through your EMR with a single click.

PHSA is encouraging all EMR vendors to implement this functionality. [Click here](#) for more information on if this integration is available in your EMR.

- Access may vary depending on if your clinic uses the Internet versus the Private Physician Network (PPN). Please contact your IT department for more information.
- The CareConnect team will inform you on how to activate the EMR integration after you are approved for access.
