CareConnect Enrolment: High-Level Overview

This guide covers **STEP 4** of the CareConnect registration process, which is **How to Apply for CareConnect Access as an On-Behalf-Of User** (e.g. MOA, Resident or Nurse (e.g. RN, LPN etc.))

The steps involved may differ slightly depending on your profession/role. See the [Key Definitions & Access Rules](#) section to learn about the different roles and/or refer to the role-specific How To Guides below:

- If you are a Physician or Nurse Practitioner, see [How to Apply for CareConnect as an Authorizer](#)
- If you are a Pharmacist or an unsupervised nurse (FNHA/LTC), [How to Apply CareConnect As An Independent User](#)

If your worksite has not already been created OR you have not been provided with a Worksite ID, see the [How to Register a Worksite as a Group / Site Administrator](#) guide.

For instructions on joining an existing worksite, proceed to [Section 2](#).

1. Key Definitions & Access Rules

CareConnect

1A. Community-Based User Definition

- A Community-Based User is defined as an individual who accesses CareConnect to support or directly deliver patient care from a private practice or non-health authority setting
- As a reminder, all CareConnect users must be associated with a clinical worksite
 - This may involve registering a private practice clinic address, working remotely from a home office or delivering/coordinating mobile care from a community-based worksite
 - If you work at multiple places of service, you must register or join each unique worksite
 - Your access may be audited based on the worksite that you access patient records from
- Community-based user access may differ depending on your profession and role
 - Access to certain clinical data is governed through Ministry of Health Designation Orders
 - Certain professions may be restricted from accessing certain kinds of data (e.g. medications, labs etc.)
 - Support staff (e.g. MOAs) may require approval to access and view CareConnect on behalf a physician or nurse practitioner

1B. Authorizer & On-Behalf-Of User Type Definitions

Authorizer

- Authorizers have the ability to approve employees to work on-their-behalf
- Must complete the Privacy & Security Course and sign the Healthcare Practitioner CareConnect Access Agreement (Physician & Nurse Practitioners)

On Behalf-of-User

- User must be granted permission by an Authorizer prior to being granted access to CareConnect
- Sponsored On-Behalf-Of User can see the same information as the Authorizer
- Must complete the P&S Course, but does not need to sign the HPCAA

Physician (Dr. Jones) designates their MOA to work 'On-Behalf-Of'

MOA (Jane) can view CareConnect as if they were Dr. Jones

1C. Independent User Type Definitions

Independent

- Users that can request access to CareConnect without an Authorizer
- Independent users cannot approve access to CareConnect like Authorizers
- Still required to complete P&S Course & requirements (i.e. HPCAA if applicable)

EXAMPLES OF INDEPENDENT PROFESSIONS

Registered Nurse
(without
GP supervision)

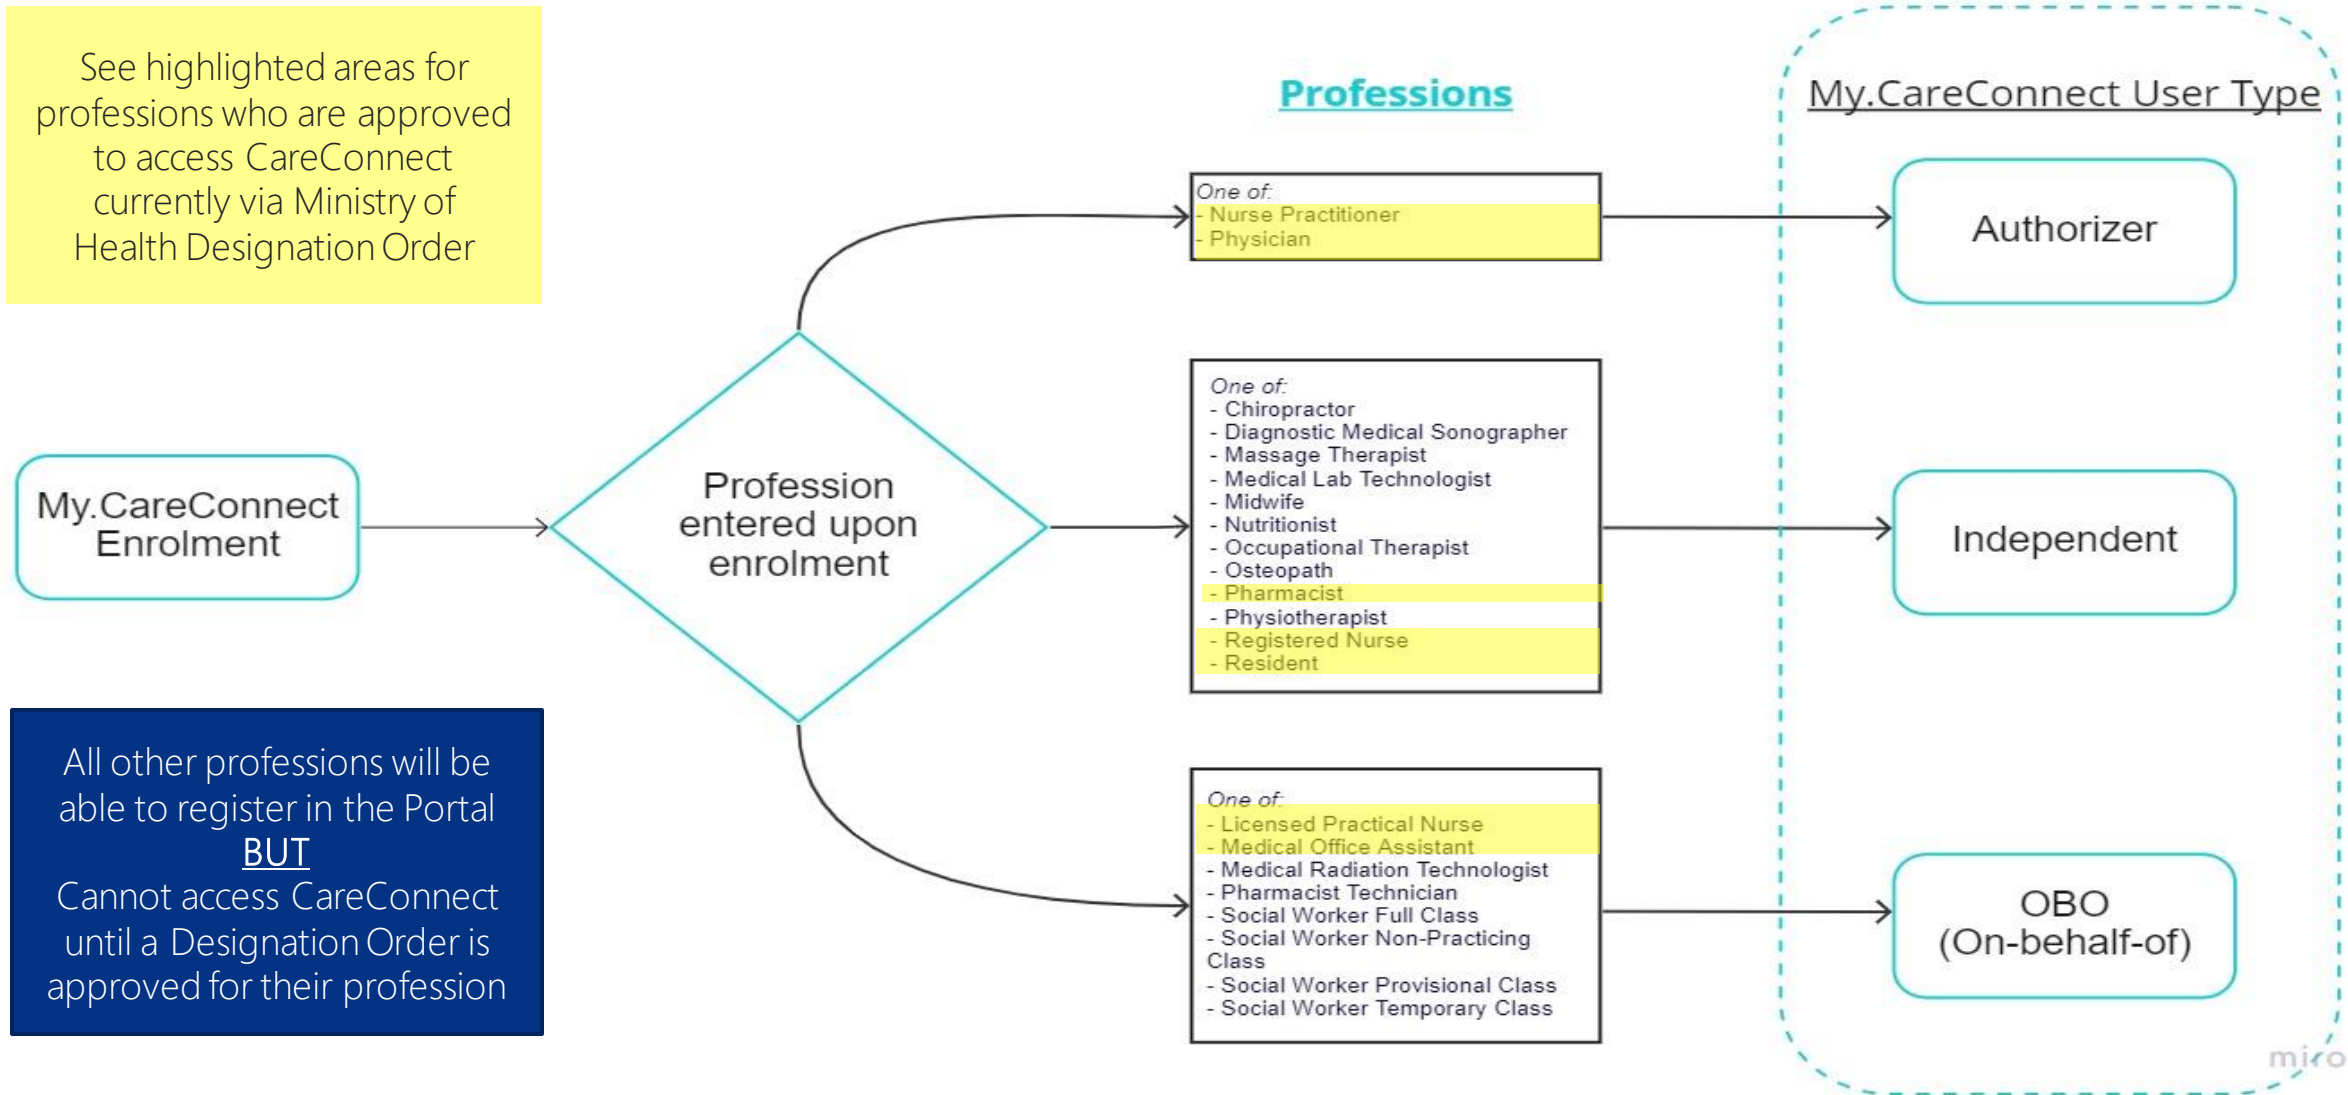

Pharmacist

Resident
