PEDIATRIC BRONCHIOLITIS TOOLKIT: LAUNCH WEBINAR – JOIN US!

Bronchiolitis is a viral infection that mostly affects infants and children under the age of two. In most cases, children will get better without the need for additional tests or treatments. When it comes to bronchiolitis, less is best.

Download the new toolkit:

Choosing Wisely Canada's new toolkit features easy-to-use tools and resources to help clinicians and caregivers manage bronchiolitis appropriately. Developed with experts from across the country, the toolkit provides guidance on the assessment and management of bronchiolitis in emergency and primary care settings.

Download toolkit: <https://bit.ly/cwc-bronchiolitis>

Join the toolkit launch webinar:

Explore the toolkit with experts Dr. Claire Seaton, pediatrician, BC Children's Hospital and Dr. Tracy Monk, family physician, Pathways BC, during a virtual education session on Tuesday, Nov. 28, 2023, from 12:00 – 1:00 PM PST. This session is for healthcare teams across BC who work in primary, urgent and emergency care. No need to register. We recommend using a computer or tablet.

SIMPLY USE THIS ZOOM LINK TO JOIN

What to expect?

- Review the care pathway for initial assessment and diagnosis in children up to 24 months old
- Review evidence-based interventions: Less is Best
- Understand indications for higher level of care
- Review the new Pediatric Bronchiolitis Toolkit from Choosing Wisely Canada
- Practice accessing the Toolkit resources using Pathways BC at point of care
- An opportunity to ask questions

Please note: Family physicians and specialists can self-claim CPD self-learning credits by logging into their CFPC or Royal College membership portal, respectively. More information on the **UBC CPD webpage**.
