

Nurse in Practice

Over the summer, we back-filled the 3rd Nurse in Practice role and sent out an expression of interest for the 4th and final Nurse in Practice. Dr. Lienkie van Zyl & Dr. Owen Brown were successful in their application to bring their total nursing allocation up to a full 1.0 FTE, and Dr. David Johnson was successful in his application for a new nurse to join him in his practice 3 days/week. Congrats to all applicants! Island Health is looking for the best applicants to fill those roles ASAP.

Indigenous Community Health Centre

We received our funding package from the Ministry of Health after submitting our Clinical Services Operational Delivery model back in May. Funding will cover 19.8 new FTEs, including family physicians, nurse practitioners, RNs, LPNs, a dietician, PT, OT, social workers, a traditional knowledge keeper, Indigenous Patient Navigator, a medical lead, and an executive director for the new health centre. The total funding package will also cover up to \$2.5m in startup costs. We look forward to continuing to work with all partners to get the new health centre up and running in the new year.

Palliative Care Approach in Longterm Care

Learn how to implement a palliative approach to care for your patients in your LTC family practice.
