Helping students cope with stress, anxiety and depression

Each year, the back-to-school time for BC children and youth is full of activity, expectations, excitement — and for some — stress, anxiety and even depression. Recent Canadian research shows that 1 in 3 students in grades 7 to 12 are reporting moderate to severe levels of emotional distress, particularly anxiety and depression.

Help is available. This sheet has been created by BC mental health experts, with youth input, in order to share information with youth and families on common signs and symptoms, what can help, and how to find support.

A few simple things that can help

- talk to others
- healthy food
- regular mealtimes
- bedtime routine
- simplify schedule
- fun exercise
- limit screen time
- yoga
- breathing exercises
- journal emotions
- no phone or computer in bed
