Note: The data on provider losses (see table above) has been adjusted to accurately reflect the leaves within the FNW communities

Patient Attachment Waitlist & Average Wait Times

“

“it’s beginning to feel a bit hopeless being a youngish doc in this area and seeing/hearing all the docs retiring or planning too soon. It’s causing me some panic too about the state of things moving forward. Although I already feel overwhelmed and overworked, I feel like I need to find a way to be part of the solution to this. If you could let me know who I could speak with about finding a way to be involved, I’d appreciate it.”

- Provider

”

■ # of People joining Waitlist ■ # of attachments — Avg. wait times

FP And NP Contracts

	Running Total of Referrals since PCN Launch	# of signed contracts
FP	111	1 Current PCN FP's on contract: 16
NP	57	2 Current PCN NP's on contract: 16

The Impacts of Unattachment

“

An attached patient has been experiencing difficulty booking appointments with their primary care provider and noted delays in communication. This reflects the importance of having a provider who is readily accessible and the importance of continuity of care.

- Patient

An unattached patient is seeking a primary care provider, due to their deteriorating health. The patient noted walk-in clinics are unable to provide the care that is needed. This reflects the importance of having a primary care provider who is able to provide adequate ongoing care.
