Patient Attachment Waitlist & Average Wait Times

Average Wait Times (last 6 months)

299 DAYS New Westminster

462 DAYS Port Moody

480 DAYS Coquitlam

248 DAYS Port Coquitlam

“it’s beginning to feel a bit hopeless being a youngish doc in this area and seeing/hearing all the docs retiring or planning too soon. It’s causing me some panic too about the state of things moving forward. Although I already feel overwhelmed and overworked, I feel like I need to find a way to be part of the solution to this. If you could let me know who I could speak with about finding a way to be involved, I’d appreciate it.”

- Provider

FP And NP Contracts

	Running Total of Referrals since PCN Launch	# of signed contracts
FP	114	1 Current PCN FP's on contract: 21
NP	59	3 Current PCN NP's on contract: 21

The Impacts of Unattachment

An attached patient is seeking an alternative primary care provider, as their clinic noted that they are not a good fit. As a result, the patient is now unattached and needing assistance finding a family doctor.

- Patient

Following the relocation of a clinic, a patient is now experiencing challenges making an appointment. As a result, the patient has requested to go back onto the waitlist to seek for an alternative primary care provider.
