**Note:** The data on provider losses (see table above) has been adjusted to accurately reflect the leaves within the FNW communities

### Patient Attachment Waitlist & Average Wait Times

Average Wait Times (last 6 months)

279 DAYS New Westminster

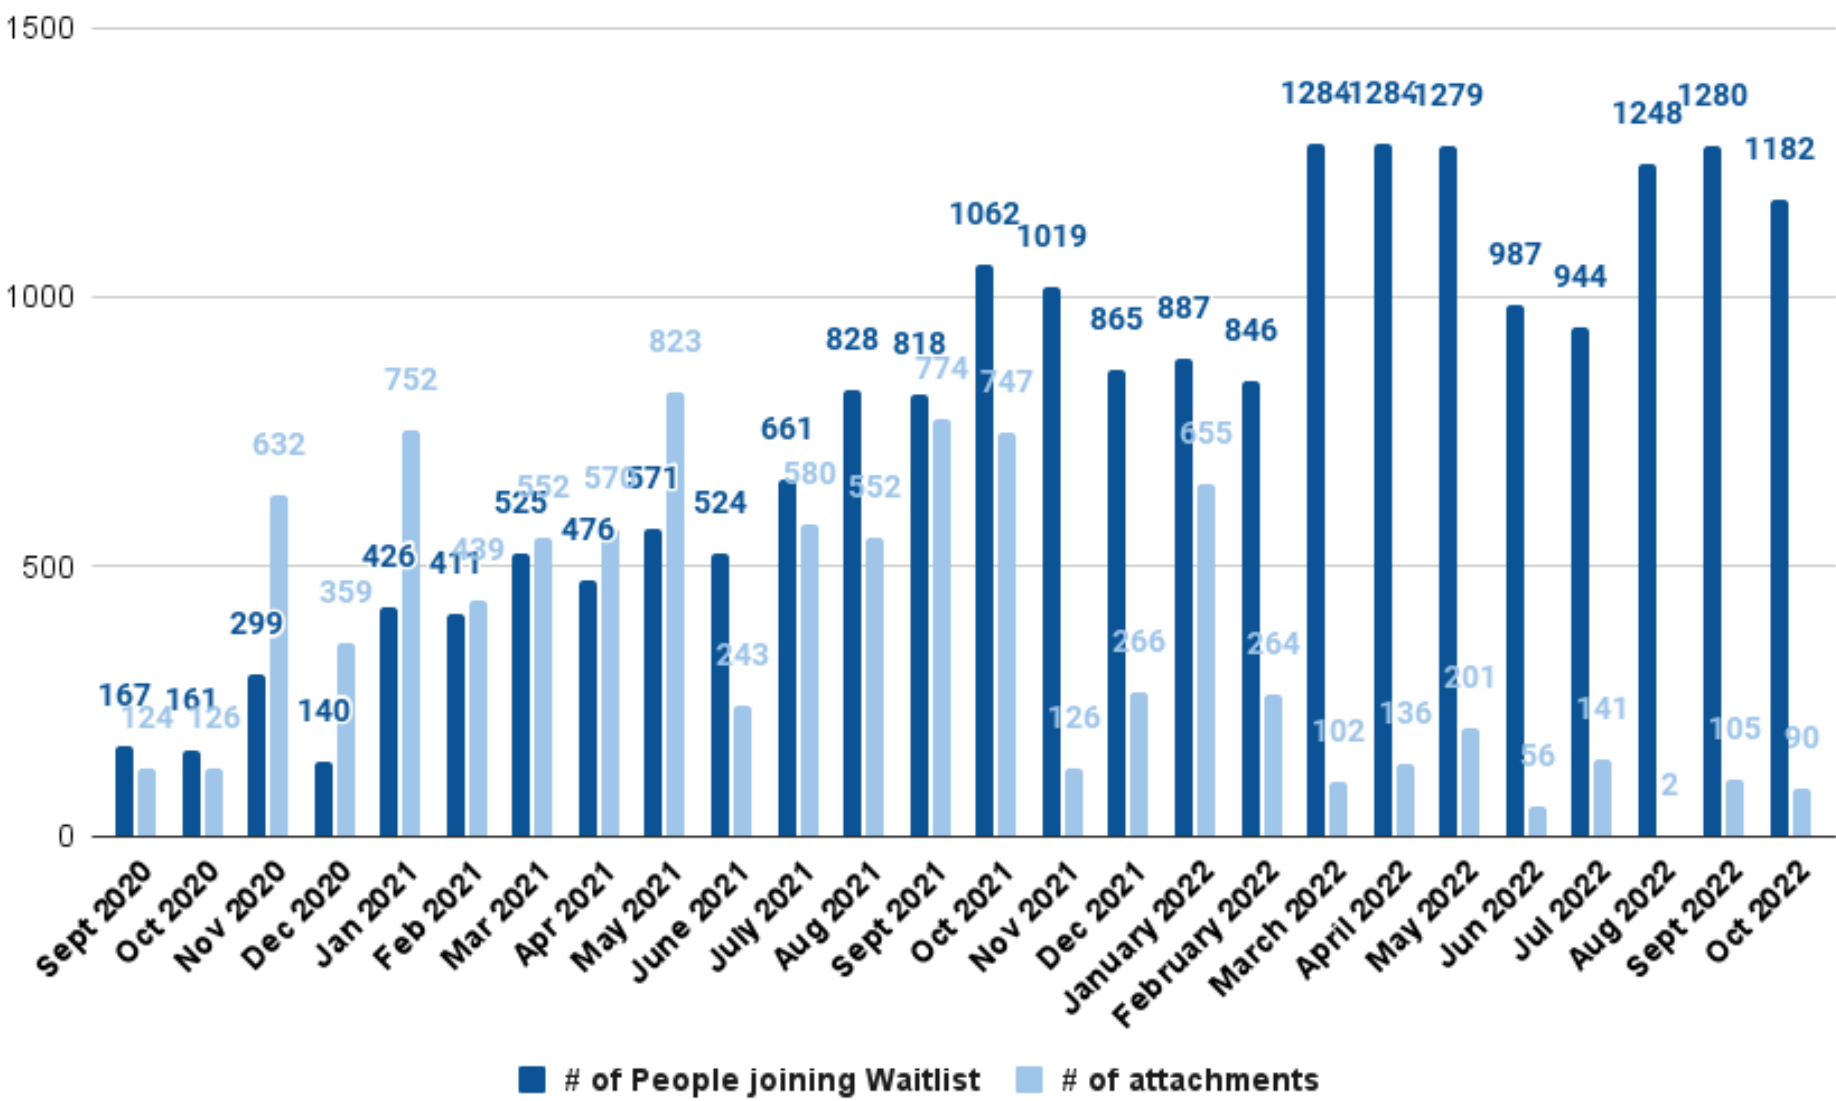

502 DAYS Port Moody

479 DAYS Coquitlam

242 DAYS Port Coquitlam

“it’s beginning to feel a bit hopeless being a youngish doc in this area and seeing/hearing all the docs retiring or planning too soon. It’s causing me some panic too about the state of things moving forward. Although I already feel overwhelmed and overworked, I feel like I need to find a way to be part of the solution to this. If you could let me know who I could speak with about finding a way to be involved, I’d appreciate it.”

- Provider

### FP And NP Contracts

	Running Total of Referrals since PCN Launch	# of signed contracts
FP	113	1 Current PCN FP's on contract: 20
NP	58	1 Current PCN NP's on contract: 18

### The Impacts of Unattachment

An attached patient is seeking an alternative primary care provider, as their clinic noted that they are not a good fit. As a result, the patient is now unattached and needing assistance finding a family doctor.

- Patient

A recently attached patient expressed gratitude for having a family doctor, especially for the ongoing health concerns of their child. This reflects the importance of having a primary care provider who is available for overseeing immediate health concerns.

- Patient
