

Unified Clinical Information (UCI) for Community Physicians

UCI remains the platform for Fraser Health Community Family Physicians & Specialists as CareConnect rolls out in BC

What is UCI?

- UCI is a foundational system that brings together a **comprehensive view of a patient across multiple systems within Fraser Health and the province in one place**, including most CareConnect content.
- It integrates health information **across the continuum of care** in support of and optimizing health care for Fraser Health citizens with interface points among **acute, community and primary care systems**.
- UCI will continue to expand to include additional information as Fraser Health moves to the Meditech Expanse platform and integrates with other provincial datasets.
- While CareConnect has become available for family physicians in BC, **UCI remains the platform for Fraser Health community family physicians and specialists to access Fraser Health centric information about their patients.**

Benefits of UCI

- **Quick access** to your patient's information
- **Reduces phone** time trying to find results
- **Enhances** continuity of care, accessible 24/7
- **Decreases duplication** of tests
- **Easily search & filter** clinical documents
- **Identify other providers** involved in your patient's care

How to Register for UCI

To start, send an email to UCI@fraserhealth.ca with the following details:

- Clinic Name, Address, Phone Number
- Clinic EMR
- Division of Family Practice that Clinic resides within
- If requestor has a Fraser Health network account
- If Clinic is on the Private Physician Network (PPN)

Once submitted, the UCI team will provide details on the next steps.

Questions, contact UCI@fraserhealth.ca
