Wellness Pharmacy #2	104-22314 Fraser Hwy, Langley, BC	604-530-5300	604-530-7250

# Daily Dispensing

What is it: daily delivery of medications to the client's home

Benefits:

- Improves medication compliance and allows for daily monitoring
- Avoid risk of over-dosing, or under-dosing

Services include (services vary based on pharmacy, please enquire):

- Witnessed ingestion
- Checking vitals (blood pressure or heart rate)
- Helping with insulin administration or blood sugar checking
- Helping with inhalers
- Applying medicated patches or creams
- Select pharmacies may deliver medications multiple times each day. If alternative doses are not witnessed, some pharmacies may offer a reminder phone
- Unused medications may be collected

Not suitable for client, if:

- Client is resistant to care, or refuses services
- Client is unable to open the door or cannot be reached by phone
- Client does not have a fixed address
- Client is not enrolled with PharmaCare, or unable to afford services (may be >40\$/day)

How to set it up?

1. **Client needs a prescription from their prescriber indicating “daily dispense”**
2. Contact client's current pharmacy to see if they offer daily dispensing services
3. If not, consider switching a pharmacy which offers this services (see backside)
4. Discuss delivery details and logistics with the pharmacy to ensure it aligns with client's schedule and needs

Tips:

- Talk to pharmacist or client's community pharmacy for assistance!
- Daily dispensing is a PharmaCare benefit. Ensure client is enrolled with PharmaCare
- Suggest changing medications to once daily if possible
- Dosing times can be changed upon discussion with the pharmacy. A doctor's prescription is usually not required (there are exceptions).
