

Community Visioning for Primary Healthcare

Introduction to project and/or top highlights: Create and implement a shared vision for primary care whereby the Division and communities are working together to enhance healthcare. Initial engagement was conducted in the fall/winter, 2018. Subsequent engagement to share the vision and create/foster partnerships with community health tables, as well as local, regional and provincial government representatives has just wrapped up. The final piece of engagement is to follow-up with the public to convey the vision as well as Division work related to the feedback received. This work should be complete in September.

Current status of project: This project will wrap up at the end of August, however there is ongoing work to action the vision with partners and communities, including local health tables. This work also feeds into the current health service planning work.

Upcoming Meetings: TBD

Name and e-mail for project lead: Rhonda Eden reden@divisionsbc.ca
