## **BLOOD & URINE TESTS**

Recommendations	Forms	Email
Recommend to ALL Women:	Standard	
• CBC, Blood ABO Group, Rh factor & antibody screen, HBsAg, STS/RPR, HIV, Rubella titre	Prenatal lab	
• Urine C&S, Chlamydia and gonorrhea (urine, cervical or vag self-collection if avail.)	<u>requisition</u>	
Additional Tests to Recommend/offer to Women with Risk Factors:		
HbA1c if at risk for Type 2 Diabetes		
anti-HCV if at risk for Hepatitis C		
TSH if <u>clinically indicated</u>	Tay Sachs	
Ferritin if at risk for anemia	Supp Info	Тау
Varicella antibody if history uncertain	<u>Requisition</u>	Sachs
• Thalassemia and Hemoglobinopathy carrier screening for all women EXCEPT: Japanese,	(submit with a	screen
Korean, Northern European Caucasian, First Nations or Inuit	standard lab	info
• <u>Tay Sachs carrier screen</u> if patient and partner are/ may be of Ashkenazic Jewish descent	requisition)	

## **GENETIC SCREENING**

Offer prenatal genetic screening to ALL women- Note options are time sensitive! Offer appropriate test(s) based on patient's age, when she accesses care, local resources, and her choice. The most common prenatal genetic screen (SIPS), involves two blood tests, one in 1st trimester and one 2nd trimester This screening lets patients know their chance of having a baby with one of these conditions: - Down syndrome - Trisomy 18 - Open Neural Tube Defects

PUBLICLY FUNDED Prenatal Genetic Testing Based on Gestational Age at First Prenatal Visit						
Maternal Age or Risks	< 13weeks + 6days		14- 20 weeks + 6 days	>21 weeks		
<35 yrs	SIPS (Serum Integrated Prenatal Screen) Part 1 at 9 -13+6 weeks Part 2 at 14-20 +6 weeks.	SIPS requisition: pdf <u>OSCAR</u>	Quad Screen (SIPS Part 2)	Detailed US		
35-39 yrs	<b>IPS</b> (i.e SIPS+NT) Integrated Prenatal Screen: SIPS + Nuchal Translucency (NT) ultrasound Done at 11-13 +6 weeks. Or <b>SIPS</b> alone if NT not avail	View your region's: <u>Sites offering Publicly</u> <u>Funded NT</u> To order NT: Write NT on any U/S req & add EDD	Quad Screen (SIPS Part 2)	Detailed US and amnio		

40+ yrs	IPS or SIPS if <b>NT</b> not avail or CVS or amnio without prior screen		Quad or amnio without prior screen	Detailed US and amnio
Personal or FHX that increases risk of Downs or trisomy 18 or trisomy 13	NIPT or SIPS if NT not avail or CVS or amnio without prior screen	<u>NIPT Requisition -</u> <u>Dynacare Harmony</u> Requesting publicly funded NIPT requires an <u>authorization code</u>	NIPT or amnio without prior screen	Detailed US and NIPT or amnio

PRIVATE PAY Options for Prenatal Genetic Testing					
Timing	Clinician and patient information	Form	Email		
<u>NIPT</u> from 9 wks on	<ul> <li>Non-Invasive Prenatal Testing - NIPT - self pay sites in BC (Perinatal Services BC)</li> </ul>	<ul> <li><u>NIPT Req - Lifelabs Panorama</u></li> <li><u>NIPT Req - Dynacare Harmony</u></li> </ul>	List of sites for patient		
FTS or <u>NT</u> @ 11-14 wks	View your region's sites for: <u>Private Pay Nuchal Translucency</u>	To order NT, write NT on any US req, add the EDD & enclose an earlier US if available			

	OVERVIEW	
Test	of Available Tests for Prenatal Genetic Screen Details	Timing
SIPS	Serum Integrated Prenatal Screen: 2 blood tests. Results for SIPS and IPS are available 10 days after the second blood test which could be as early as the 14th week of pregnancy.	<ul> <li>Part I @ 9 -13+6 wks</li> <li>Part 2 @ 14-20 +6 wks</li> <li>Publicly funded</li> </ul>
NIPT	<ul> <li>Non-invasive Prenatal Screen: blood test that measures the amount of cell-free fetal DNA circulating in maternal serum. NIPT provides a screen risk for Down syndrome (trisomy 21), trisomy 18 &amp; trisomy 13.</li> <li>NIPT does not test for neural tube defects. Detailed US @20 weeks tests for neural tube defects. Results of NIPT could be available as early as the 10-11th week of pregnancy depending on timing of testing.</li> </ul>	<ul> <li>(\$) Private pay from 9-10 wks</li> <li>Publicly funded in Second Trimester if screen + SIPS/IPS/QUAD.</li> </ul>
IPS	Integrated Prenatal Screen: SIPS + Nuchal Translucency (NT) IPS includes two-part SIPS bloodwork as above, plus nuchal translucency NT ultrasound	<ul> <li>SIPS Bloodwork as above</li> <li>NT US @ 11-13 +6 wks.</li> <li>Publicly funded age 35 or more</li> </ul>
ΝΤ	<b>Nuchal Translucency:</b> Ultrasound to measure the thickness of the fluid buildup under the skin at the back of the developing baby's neck. If the fluid buildup is thicker than normal, it can be an early sign of Down syndrome, trisomy 18, or open neural tube defects. To order from <u>available sites</u> , write NT on any US req, add Estimated Date of Delivery (EDD) & enclose an earlier Ultrasound	<ul> <li>11 - 14 weeks.</li> <li>Part of IPS – publicly funded if age 35 or more, or Part of FTS – (\$) private pay</li> </ul>
Quad Screen	Quad Screen: SIPS Part 2	<ul><li>14-20 +6 wks</li><li>Publicly funded</li></ul>
FTS	<b>First Trimester Screening:</b> blood test for PAPP-A & free-BHVG + US for Nuchal Translucency (NT), Nasal Bone (NB), Fetal Heart Rate (FHR) & Ductus Venosis Flow (DV). Results could be available as early as the 11th week.	• (\$) Private pay at 11-14 wks

	BILLING			
	Related Billing Information			
	Ensure you have read all the fee details before billing. Note this algorithm is a clinical support tool and use of it is not a requirement for billing this fee.			
14002	<b>Maternity Care Risk Assessment</b> – billable in addition to a visit – read ** <u>full fee details**</u> Payment for a Maternity Care Risk Assessment based on the BC Antenatal Record, including review of gestationally appropriate screening interventions, pregnancy risks, and patient comorbidities.	\$50
