Welcome to the Core Loyalty Program

As a previous physician recruiter, and having worked with a Division of Family Practice and Doctors of BC, I have the ability to understand your unique needs when it comes to relocating to our beautiful region. I am also honoured to give back 25% of my earnings from each sale or purchase directly or indirectly referred by the Nanaimo Division of Family Practice.

About Nanaimo & Surrounding Areas

Nanaimo, and the surrounding areas provide families and professionals with a unique Vancouver Island experience. The small town feel, yet urban city opportunities allows this community to thrive in a unique way not otherwise seen in the hustle and bustle of big city life.

With lifestyle opportunities right on your doorstep, you're able to just GO instead of travelling long hours to get to your favourite hiking spot, swimming at the lake or cozy cafe.

Our mild climate here on Vancouver Island allows for outdoor activities to take place all year round, and our close proximity to Vancouver, Victoria, Tofino and the scenic North Island creates an everlasting adventure experience.

The Process to Finding Your Dream Home

Relocating and finding your next dream home may seem like a daunting process. I take pride in guiding new residents through the process smoothly. I approach the process with passion by giving you a true Vancouver Island experience whether that is sharing the local gems of the area, or explaining the perks of each neighbourhood. My knowledge of Nanaimo and the surrounding areas goes beyond what you see in your usual real estate advertisement.

My goal is to guide you to make the best decision for today's market conditions while finding your dream home that is so personal to you. I believe purchasing a home is much more than 'buying.' It is an experience that you'll never forget, and because of that I make sure to create long lasting, positive memories for new residents.

For me, the most rewarding experience is to go that extra mile and help make dreams come true! Can't wait to connect.
