Subject: Manager - Kamloops Urgent Primary Care and Learning Centre

I am pleased to announce that Kim Madill has accepted the position of Manager, Kamloops Urgent Primary Care and Learning Centre, effective Monday, January 7, 2019. She will be replacing Kerry McLean Small for a two year term as Kerry fulfills the position of Regional Lead, Urgent Primary Care.

Kim has worked for Interior Health since 1990 across the healthcare continuum as a physiotherapist in acute care, outpatients as a Certified Hand Therapist, Home and Community Care and Long-term Care. She started her career as a primary care provider in private practice. She is currently the Professional Practice Leader for Home and Community Care, Physiotherapy in Kamloops and TCS rural sites including Clearwater and Ashcroft. She oversees the rehabilitation teams in the short stay bed program and long-term care at Ponderosa Lodge and long-term care at Overlander Extended care.

Kim has worked with various teams including the steering committee for Surgical Services Program to develop a surgical optimization clinic in Kamloops for enhancing the surgical journey for those patients waiting for total hip and knee surgery, worked collaboratively to develop and deliver the Living Well education session to help prepare people for surgery, was part of the team that supported Home and Community Care staff with transition to new site on Kamloops north shore, and led initiatives to improve access and flow between Royal Inland Hospital and Ponderosa Lodge short stay bed program.

Kim's leadership style is participatory and collaborative, and she values each team members' contribution to the services provided to our patients and for ideas that can enhance this service. She is excited to be in this role and is passionate about being part of the team that is providing patients the opportunity to have improved access to urgent primary care services.

Outside of work, Kim enjoys road biking with her husband and friends as a member of the Interior Grasslands Cycling Club, and skate skiing as part of her Nordic Host duties at Sun Peaks.

Kim will be working from an office at the Kamloops Urgent Primary Care and Learning Centre.

Please join me in congratulating Kim on her new role.

Jason
