

INNOVATION HUB

Highlights

This project is a partnership of the SOS Division, Ministry of Health, Interior Health and Telus to develop EMR solutions based on clinical practice needs.

- Focuses on optimization of EMRs for primary care.
- Aims to achieve interoperability of EMRs and shared communication to work towards a “one-chart” vision.
- Aims to improve continuity of care, and support the relationship between patients and care providers.

Project: Sep 2018 — Mar 2020
