

# INPATIENT PROGRAMS

## Highlights

This program is the fundholder for GPSC incentives for networked inpatient care in 3 hospitals: Penticton Regional Hospital, South Okanagan General Hospital and Princeton General Hospital.

- Inpatient programs support continuity of care for patients, based upon a Doctor of the Day call group model.
- Inpatient programs enabled the development of a new community-based approach to care for unattached patients at PRH, which includes Community Inpatient Services (CIS).
- CIS and Doctor of the Day scheduling and billing are supported by the SOS Division.
- Inpatient service at PRH creates new opportunities for physician employment, resulting in additional physicians working in our community.

**Ongoing (Started Apr 2018)**
