

PRIMARY CARE NETWORK

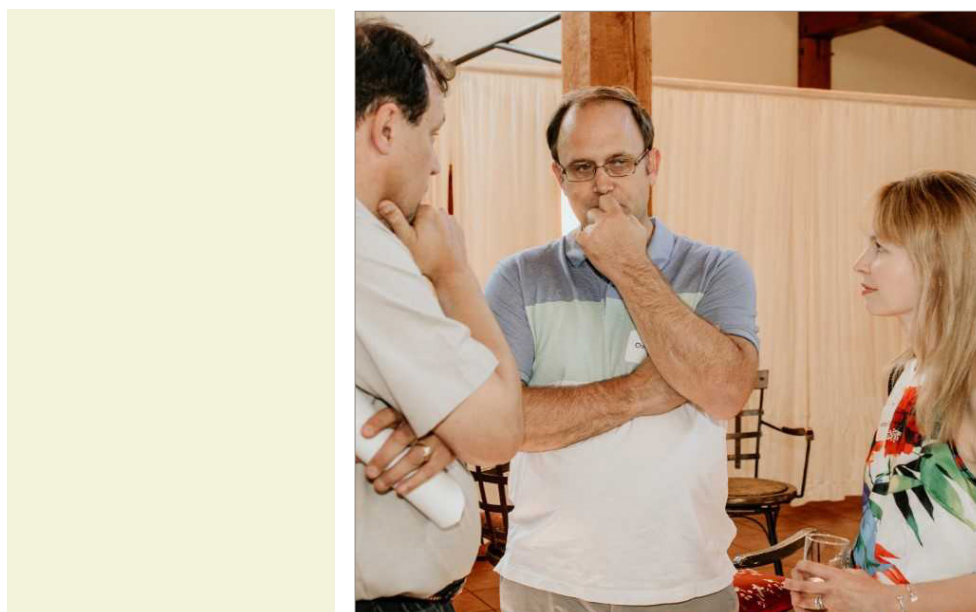

Highlights

This partnership of the SOS Division, Interior Health, Ministry of Health, and local aboriginal communities aims to integrate team-based primary care services into our strong physician network.

The goal of this partnership is to attach patients to primary care providers and ensure all people in a community have access to quality primary care teams.

- Improved primary care provider network and coverage of responsibilities by team.
- Improved job satisfaction for all team members.
- Improved transitions into practice for new physicians, while supporting physician wellness, planned retirements and panel hand-offs.
- Integrated with Interior Health primary care services.

Project: Mar 2018 — Mar 2020
