

# PRINCETON ACCESS TO SPECIALIST CARE

## Highlights

This project aimed to improve and sustain Princeton patient access to specialist care, and to support Princeton physicians in providing optimal care through improved relationships with specialists and better access to specialty CME.

The project saw 186% improvement in access to specialists with 13 Penticton-based specialists visiting Princeton on a regular basis from 11 speciality areas:

- cardiology
- general internal medicine
- general surgery
- methadone programs
- nephrology
- orthopaedics
- paediatrics
- psychiatry
- respirology
- rheumatology
- urology

**Project Complete (Nov 2014 — Dec 2015)**
