EMAIL: [events@sidfp.com](mailto:events@sidfp.com)

## ➤ LEARNING TOPICS

- **Interpregnancy Counselling** - What do care providers need to know to counsel their patients about future pregnancies.
- **Higher risk individuals** - Who to refer to Internal Medicine/ Cardiology and what to consider if you need to start medications in this population.
- Screening your family practice patients and guidelines for caring for people affected by hypertensive disorders of pregnancy.
- **Cardiovascular disease in women** - What is the different in screening and management compared to men.

## ➤ LEARNING OBJECTIVES

- What risk factors in pregnancy increase a person's overall lifetime cardiovascular risk.
- How to counsel a person with a previously affected pregnancy on how to reduce their risk in future pregnancies
- How to appropriately screen people in our practice and how to manage them over the long term.
- What are the considerations to think about when managing women with cardiovascular disease in our practice.
