

FaceTime – physicians are allowed to use FaceTime and this is what VCH is currently using. The main consideration is that **iCloud must be turned off on your phone**. VCH created a Standard Operating Procedure which can be found here: <http://shop.healthcarebc.ca/vch/VCHDSTs/D-00-16-30128.pdf>

- Consent form – The DTO has been recommending that physicians/clinics use the one from the CMPA as this covers all forms of electronic communication.
- Zoom – Recording functionality must be turned off. We recommend the paid version of Zoom as it allows you to configure the Data Residency and ensure that the data stays within Canada.
