

EMR Data Request

Dr. Richard James and Geri McGrath have been visiting clinics asking for physician input into identifying gaps and needs in our community. At the same time, the Division is asking members to provide EMR data in order to help determine what health services are needed for chronic disease management. Information packages will be delivered to each physician for completion by February 28. **All data will be anonymized and aggregated.** Byron Salahor is available to assist with data collection. Please contact the Division for assistance or further information at delta@divisionsbc.ca or 604-943-5591.
