January 26, 2022

**COVID-19 Update #21**

- Since mid-December 2021, Omicron has been the dominant variant among COVID-19 cases in Island Health. While the number of people infected with COVID-19 has increased substantially, the proportion of those with severe disease has substantially decreased:

Percentage of Island Health cases reported from 1-14 Dec 2021 (Delta-dominant) and 18-31 Dec 2021 (Omicron-dominant) hospitalized, requiring critical care, and deceased as of 10 Jan 2022

- Public health management of COVID-19 is shifting towards alignment with other respiratory pathogens and to self-management based on symptoms. Many provincial guidelines have been recently updated, notably the updated testing guidelines, and can be found at [bccdc.ca/health-info/diseases-conditions/covid-19](https://bccdc.ca/health-info/diseases-conditions/covid-19).
- Those who are unvaccinated continue to be at higher risk of severe outcomes. Of the Island Health cases requiring critical care so far in January, ~70% have been unvaccinated adults despite representing only ~5% of the total population. The most important intervention against harm from COVID-19 remains the first dose of vaccine. Please continue to work with your vaccine-hesitant patients with supporting resources:
  - Patient-oriented Q+A: [immunizebc.ca/covid-19](https://immunizebc.ca/covid-19)
  - Healthcare provider communication tool: [bit.ly/3j4cOFj](https://bit.ly/3j4cOFj)
  - BCCDC toolkit for health professionals: [bit.ly/382A1Bl](https://bit.ly/382A1Bl)
- COVID-19 mRNA vaccines are now available through many pharmacies, in addition to Island Health clinics. Access is primarily through the provincial system at [gov.bc.ca/gov/content/covid-19/vaccine/register](https://gov.bc.ca/gov/content/covid-19/vaccine/register). Viral vector vaccines (AstraZeneca, Janssen) can be requested through the provincial call centre at 1-833-838-2323.
- Outpatient treatment is available under specific eligibility criteria, see [islandhealth.ca/learn-about-health/covid-19/outpatient-covid-19-therapeutics-clinic](https://islandhealth.ca/learn-about-health/covid-19/outpatient-covid-19-therapeutics-clinic).
