

Launching an Attachment Mechanism in the Saanich Peninsula

Physicians Forum

March 1, 2021

Progress to Date

Now

Attachment Coordinator hired, work underway to develop and implement process alongside Health Connect and project team

Attachment Working Group & Saanich Peninsula Leadership Committee endorse launch

Shoreline Medical offers support as an early adopter

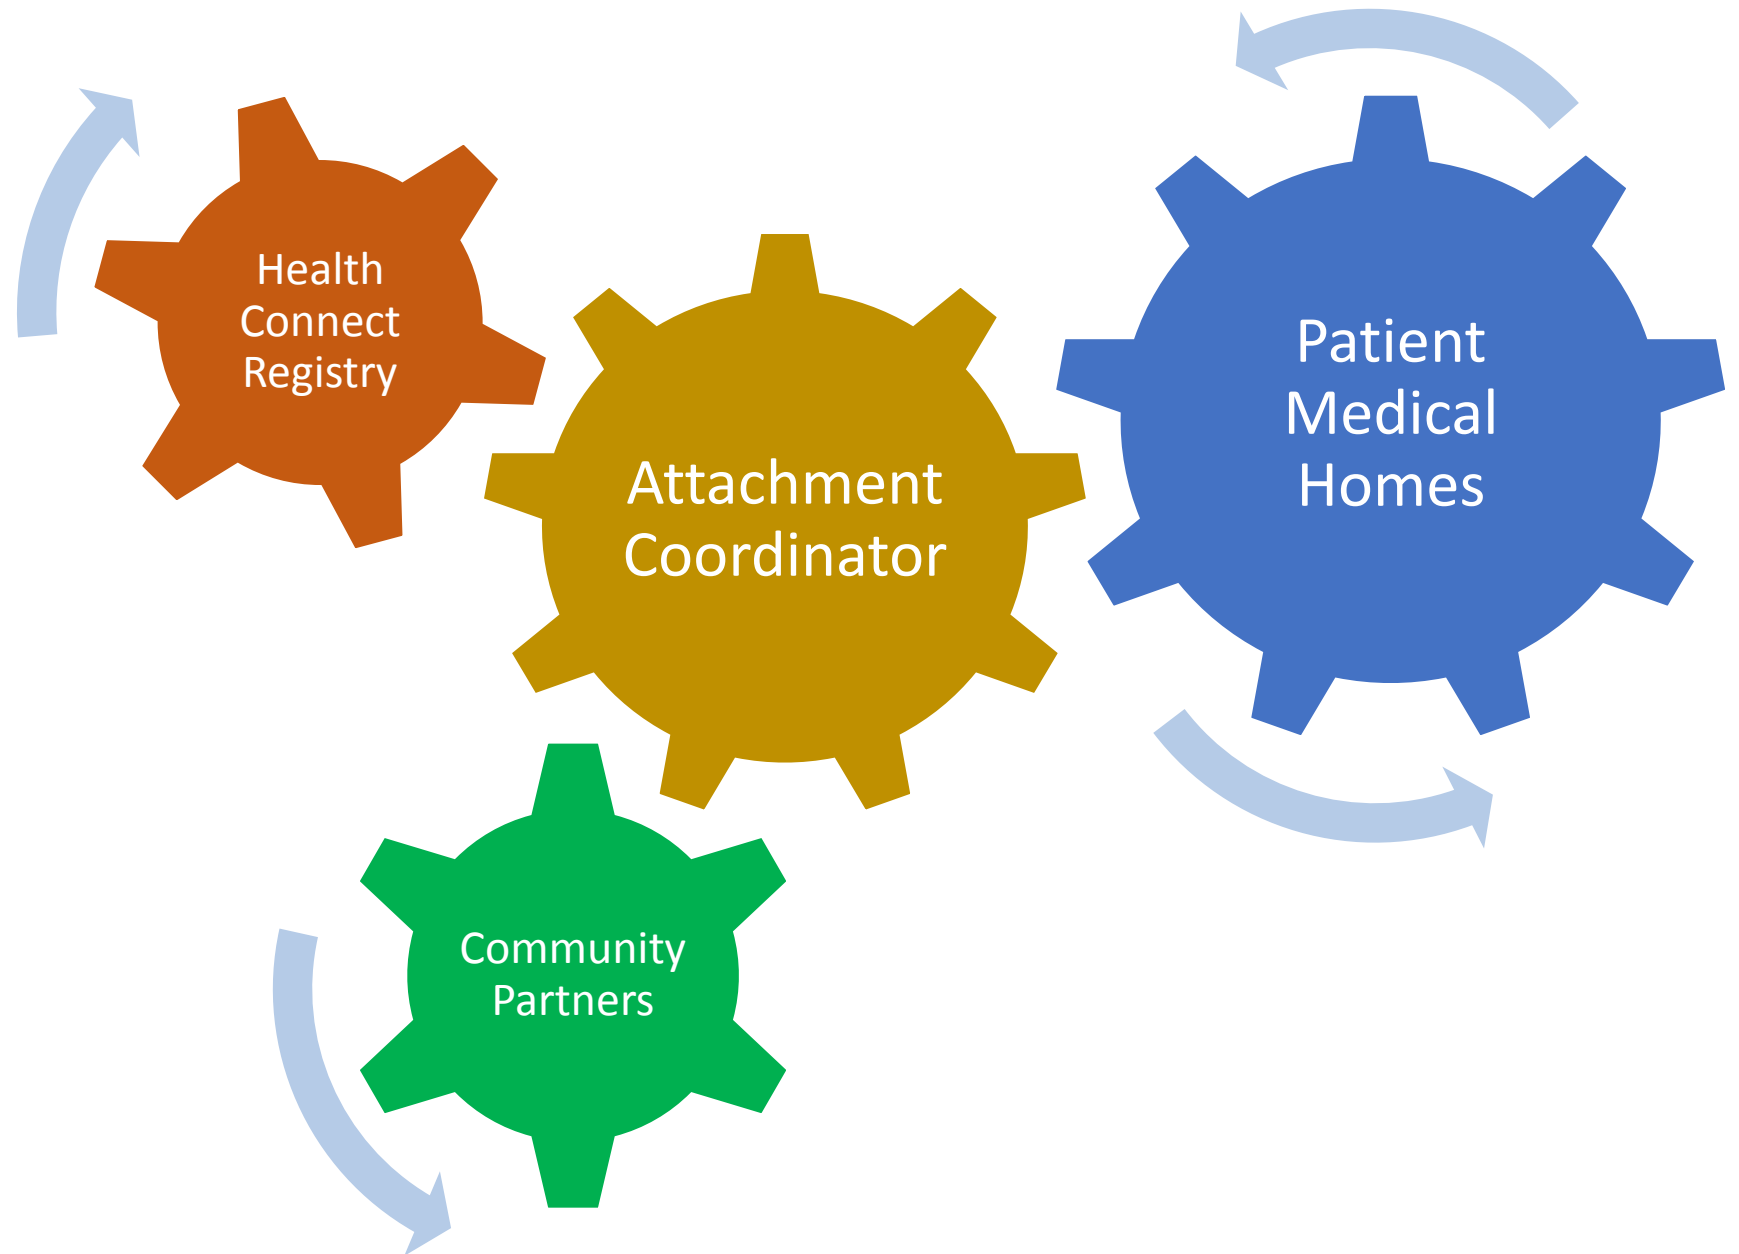

Attachment Working Group begins work on strategy and model development

PCNs are established alongside a mandate to implement an attachment mechanism

Overview

Key Questions:

Clinic Process

- Are there internal attachment processes unique to your clinic that you would want to keep?
- What parts would be beneficial to standardize, and what parts may need to differ?

Two PCNs, Two Strategies?

- Is there value in differing the mechanism and processes between the Western Communities and Saanich Peninsula?

Priority Referrals

- What are your thoughts around priority referrals?
- Which patient groups could be prioritized (ex. palliative, new mothers, mental health)?
- Which community partners (ex. CLBC) or sites (ex. hospitals) could the PCN give access to priority referrals?
